

CELLULAR BACKHAUL SOLUTIONS

1

MACLEAN POWER SYSTEMS

MacLean Power Systems is a leading manufacturer of products for the CATV, electric utility, telecommunications and civil markets. Our complete line of pole line hardware answers the needs of any aerial plant construction requirements.

2

EXFO
EXPERTISE REACHING OUT

EXFO's mobile backhaul focused products deliver the performance and flexibility to remotely carry out both automated testing and live service monitoring throughout an entire network.

3

Telect

Gain maximum flexibility and advanced capabilities with Telect backhaul solutions. Compact, cost-effective and dynamic T1 demarcation and testing panels, multifunctional (DS1, DS3, Ethernet, fiber) connectivity systems, and power distribution – all are just 1 RU.

4

MaxCell
FABRIC INNERDUCT

MaxCell Fabric Innerduct allows for placing up to 300% more cable in occupied or new conduit structures. Overriding existing cable structures provides substantial plant construction costs by reducing or eliminating the need for trenching in new conduits.

5

Vikimatic
SINCE 1978

Vikimatic delivers diverse and original outside plant and underground products to help provide timely solutions for a multitude of utility construction situations, focusing on Telco customers as well as government and private network initiatives, including FTtx plant requirements.

6

wirewerks

Wirewerks is an end-to-end Fiber connectivity backbone provider for high performance systems that require a premium reliable solution. Wirewerks provides the entire range of Fiber management from patch cords, cassettes, adapters, to high density panels.

7

IVT
INVENTRONICS

Inventronics is a manufacturer and designer of custom outdoor enclosures. For more than 35 years, we have built a reputation as a high quality, cost effective supplier to many telecommunications, CATV, and utility companies.

8

ANDA
NETWORKS

ANDA Networks provides innovative carrier-class Ethernet equipment solutions for delivering cost-effective Metro Ethernet services over fiber, copper, and wireless based access networks serving a key role in Maximizing Ethernet Service Reach for our carrier customers worldwide.

TVC Communications has the leading strategic vendor relationships, products and integration capabilities to help our customers deploy Cellular Backhaul projects quickly and cost effectively. Aerial, underground, in-shelter, or on open platforms, TVC will provide all the products you need for any application you face. Contact us today!
