

MINIMAX ROLLING INSTALLER BAG

With twice the storage space and extra pockets, the new MiniMax Bag maximizes your ability to handle mini coax wiring in the field. The larger rolling bag with telescoping handle includes a compartment that holds two 250' spools of mini RG59 cable or 50' or 5-pack. It also features additional storage pockets outside the bag to organize connectors, tools and accessories. The MiniMax Bag can be bought separately, or as a customized kit which includes the connectors, tools and accessories you use the most.

TESTERHT TEST KIT – F, BNC, RCA, SMB

&

TESTERBC TEST KIT – F, BNC, RCA, 1.0/2.3

WSE Test Kits simplify the testing and remote identification of coaxial cable assemblies. The F pocket toner verifies continuity, shorts or opens, while adapter cables enable the toner to be used with a variety of A/V connectors in broadcast, home theater, and CATV applications. Our Test Kits are compact, easy to use, and can easily test cables terminated in different rooms.
