

10REMTOOL

Removal tool for 1.0/2.3FPB connectors - especially for high-density installations.

1023 CABLE ASSEMBLIES

We also make jumper cables and pigtails for wiring and testing equipment with 1.0/2.3 connectors, including 1.0/2.3 to BNC male or female connectors.

TESTERBC TEST KIT – F, BNC, RCA, 1.0/2.3

The TesterBC kit simplifies the testing and remote identification of broadcast coaxial cable assemblies. The pocket toner verifies continuity, shorts or opens, while adapter cables enable the toner to be used with a variety of A/V connectors including BNC, RCA, F and 1.0/2.3. Because of the fixed pin design used in our connectors they can be tested prior to crimping, saving time and connectors.
