

# SPLIT DUCT

## 90° SPLIT DUCT SWEEPS

For making bends in the ground or for risers out of the ground.

CRS Split-Duct Sweeps are a by-product of our split conduit. They are great for 90 degree turns in the ground or for 90 degree risers coming up out of the ground.

Just as with the split conduit, when snapped together, the unique interlocking design of the Split Sweeps creates a smooth tight seal protecting the cable of fiber optics from weathering. No tape, plastic, or metal straps are needed to seal or provide extra strength to the split sweeps.

It is necessary to use CRS split couplings and/or split adapter couplings to connect the sweeps to the CRS split conduit or to standard PVC pipe.

Patent No. 5,462,312
