# YOUR TRUSTED PARTNER FOR FIBER

If you're establishing a new fiber network or expanding an existing one, TVC's decades of experience will help you get the job done right. Building on our long-term reputation as a leader in end-to-end solutions for fiber optic networks, TVC has the innovative products and services as well as the expertise to help you meet the exploding demand for bandwidth and capacity.

## IN-STOCK SOLUTIONS

TVC has partnered with many of the industry leading suppliers for best-in-class products to help you navigate designing, building and deploying fiber optic networks. TVC has taken a stocking position to help you keep your fiber projects on time and on budget. Our distribution centers are located throughout the USA, Canada, Caribbean and Latin America to provide customers quick delivery of our comprehensive array of products.

## PRODUCT MANAGEMENT

No matter what your fiber network's size or architecture, TVC has a vast portfolio of field-proven products to meet your project needs. Our knowledgeable product management team has the experience and problem-solving capabilities to connect you to the right solution for your project. We can assist in technology selection, BOM creation, product training, on-site installation and trouble-shooting.

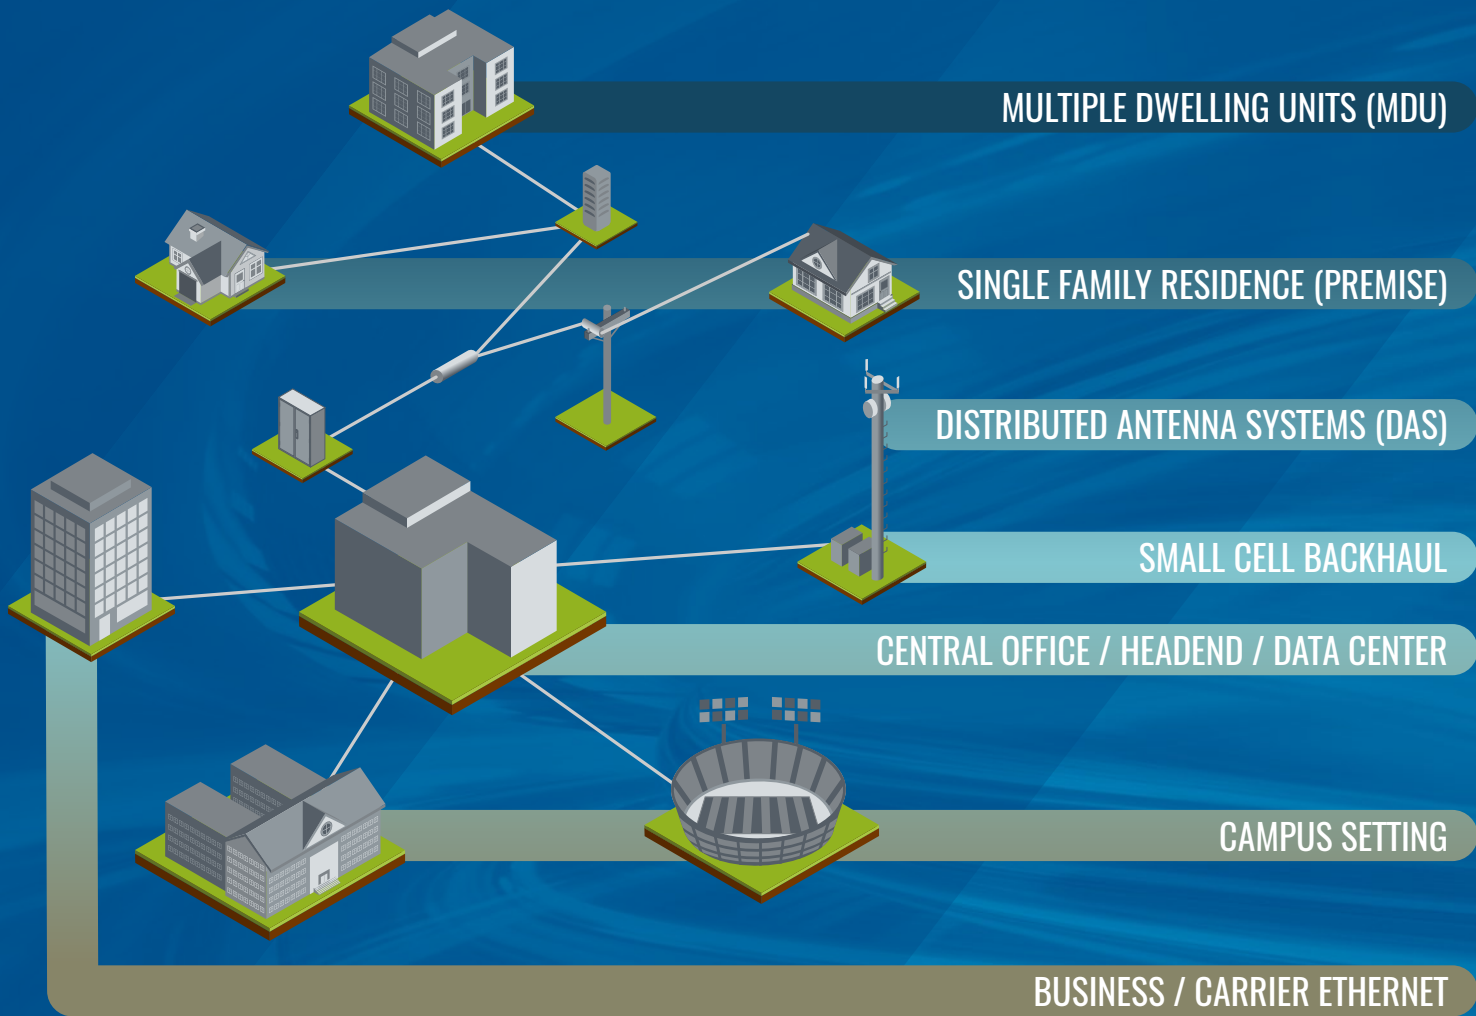

## PROJECT MANAGEMENT

TVC can help streamline your project with a variety of end-to-end supply chain solutions that will save you time and money including: warehouse staging, material staging (both on-site and off-site) product kitting, Just-In-Time delivery, VMI services, project planning/management/make-ready, cable cutting and customized eCommerce solutions. Our unmatched customer service and account management professionals ensure your fiber build projects stay on budget and on schedule.

## RURAL COMMUNITIES

TVC understands that broadband is vital to rural America's economic viability and is a game changer by boosting economic development, sparking innovation and transforming the way people work and live. We have a proven history of helping rural communities cost-effectively deploy fiber networks and deliver high-speed access.

## FIBER OPTIC PRODUCTS

TVC delivers the products for building scalable, future-ready and cost-effective fiber networks. Our extensive investment in inventory, coupled with our excellence in customer service, will ensure your fiber projects stay on schedule.

- Assemblies & Patch Cords
- Cabinets & Enclosures
- Cable & Connectors
- Consumables
- HFC Passives
- HFC/RFoG/PON Distribution Actives
- MaxCell & MaxSpace
- OSP Products
- Personal Protective Equipment (PPE)
- Preparation, Inspection and Cleaning Tools
- Rack & Wall Mounted Panels
- Racks
- Safety Equipment
- Splice Closures
- Splitters & WDM's
- Test Equipment

**Future Network Flexibility**

**PLAN FOR THE FIBER NETWORK OF TOMORROW WHEN BUILDING TODAY**

MaxCell®, the flexible fabric innerduct, allows increased cable density in a conduit while preserving space for future bandwidth expansion. MaxCell's unique fabric construction conforms to the cables placed within, greatly reducing wasted space compared with rigid innerduct.

Greenfield or congested conduits, curb to building or ISP, MaxCell flexible fabric innerduct excels in all applications. Available in sizes to fit all conduits, MaxCell adds pathways quickly and is installed easily and cost effectively.

**THE BOTTOM LINE:** MaxCell helps you expand broadband capacity today, preserves space for future bandwidth requirements, and reduces total project costs.

**INDUSTRIES THAT USE MAXCELL:**

- Broadband
- Telecom
- Utility
- Enterprise/Data Center
- Transportation
- Military

*Design and fabrication of MaxCell is patent protected.*

**Future Network Flexibility**

**WATCH MAXSPACE IN ACTION**  
[www.maxcell.us/MaxSpace.aspx](http://www.maxcell.us/MaxSpace.aspx)

MaxSpace® is a no-dig conduit space recovery solution designed to safely remove rigid innerduct from around active fiber cables with little to no load on the cable and no interruption of service. Regain up to 90% of your conduit space for new fiber optic cables as opposed to trenching and laying new conduit.
