

myTVC

Customized eCommerce

Solutions

myTVC is a fully-customizable eCommerce solution that combines approval processes, access control and reports to ease your procurement process.

eProcurement Solutions

myTVC combines a familiar eCommerce purchasing experience with extraordinary access control, custom reports, and visibility of TVC's database of thousands of products.

We can help customers increase their operational efficiencies by simplifying their daily business workflow and tailor their purchasing process to fit their needs with our fully-customizable myTVC eCommerce solution. TVC has the financial resources, technical ability, and national distribution network to be part of your eProcurement strategy.

Our eCommerce platform saves you time with easy ordering and fast checkout, delivering you an effective order management tool that allows full control of your spend, helps you streamline the approval process and create reports to fit your specific needs. Customers can place orders from specific approved product listings, move through their own approval process, and check real-time inventory and shipping information.

Custom eCommerce Options

Every customer has the ability to specify their own e-procurement experience with TVC, including:

- Approval processes according to your business needs
- Multi-tier profiles with different layers of authority built to your specifications
- Real-time visibility of inventory levels
- Customizable favorites lists for quick repeat purchases
- Dedicated customer support
